

Meet Glowforge

Reviewers Guide

Our Story

It all started the moment a forklift driver dropped an industrial carbon dioxide cutting laser, imported directly from a factory in China, on my front lawn.

I've always loved making things. When my kids and I came up with the idea for a bestselling boardgame, I searched high and low for the right prototyping tools to bring our invention to life. Installing factory equipment in our garage was an ordeal I'd never repeat again. But when it was finished, I realized I had found something magical.

There was a button. I could push it. And beautiful things would appear, as if by magic. That was the inspiration behind the Glowforge 3D laser printer. Something simple enough for a child to use, but powerful enough to create anything you can imagine. A way to give everyone the same creative superpower I had delivered to me on that day: *the ability to bring your dreams to life, at the push of a button.*

That magic can change the world.
I want us to make that change together.

Creative Tools to Enhance
your Designs

Proofgrade™

Proofgrade materials are the first materials that are sourced, prepared, encoded, and lab-tested for perfect printing, every time. Proofgrade materials are specially formulated for the Glowforge 3D laser printer and work well with other cutter/engravers using CO2 laser technology.

Sourced from expert tanners, selective lumber mills, and more

Digitally Encoded to Recognize the Ideal Print Settings

Protective Coating to Guard your Materials

Glowforge Basic

The original 3D laser printer. Create beautiful prints on dozens of materials right at home. Onboard cameras and a powerful laser to make it easy to create beautiful products at home.

Glowforge Plus

Bring your vision to life at the speed of light. The Plus builds upon the magic of Glowforge Basic with upgraded components and a top engraving speed that's up to twice as fast as the Glowforge Basic.

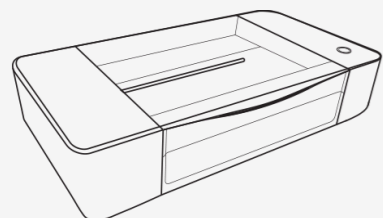

Passthrough

Glowforge Pro ⚡

Ready for your biggest ideas. The most powerful and capable Glowforge is the same size, but can print enormous objects with the Pro Passthrough slot. Upgraded cooling and a more powerful laser for faster printing.

Our Most Popular Model

Glowforge Dimensions:
20.75"d x 38"w x 8.25"h

What to expect next...

You're just a few steps away from making something magical.

Unbox

Get a friend; it's a two-person job.

Setup

No tools required!

Print

There's a traditional first print, but if you have a better idea, go for it!

You'll receive:

Three packages when your Glowforge arrives:

Glowforge + Proofgrade™ Pack, Air Filter, Crumb Tray and Accessories

It only takes 30 minutes to go from the doorbell's ring to making something. To get started, just go to <https://www.sg.glowforge.com/>
